YASH SHAH
UNIVERSITY OF WATERLOO

TECHNICAL SKILLS

Languages: Java, C, HTML, CSS/SCSS, Javascript, React, Ruby
Framework: Android, Rails, Bootstrap, Foundation
Software: Windows, Mac OS X, Linux(Learnt using Raspberry Pi)

WORK EXPERIENCE

Chalk.com   May 2015 - Aug 2015
Software Developer
- Rewrote Markboard from Backbone to React to optimize speed improvements and to create a better experience for thousands of teachers
- Created the front-end using React, HTML and SCSS for a better UI/UX and maintained the backend using Ruby

PROJECTS

STARTUP FINDER, Android   Android Play Store
- Allows students to find startups across the K-W region and view a startup's info, products, latest activity and job openings
- Implemented Google Maps API, Twitter API through Fabric and Firebase Database
- A side project during my full-time job at Chalk

SPACE RUN, Android   Github | Android Play Store
- A side scroller game utilizing the open source engine, LibGDX
- Implemented object oriented programming

...More projects on my website
